Summary

Focused **Information Technology professional** specializing in **Front-End Development** and **Computer Systems Maintenance**. I combine a "design-first" philosophy using **Figma** with technical proficiency in **React, JavaScript, and PHP** to build responsive, user-centered applications. With a proven background in hardware troubleshooting and network optimization, I am dedicated to delivering clean code and efficient IT solutions that streamline workflows and enhance system performance.

Experience

Southern City Colleges

Location

Maintaining and cleaning computers, assisting with basic networking

2025

- Managed comprehensive technical maintenance for a laboratory consisting of over 30 computer units to ensure a stable learning environment. I performed detailed hardware diagnostics and replaced defective components to proactively prevent system overheating and hardware-related failures.
- Executed clean operating system installations and configured all necessary drivers to guarantee that every workstation was fully optimized. These efforts ensured that administrative personnel and students had immediate access to fully functional and secure computing resources.
- Resolved complex networking issues and provided on-site technical support to maintain consistent connectivity across the campus facility. By monitoring hardware reliability, I was able to troubleshoot and fix connectivity bottlenecks before they impacted daily school operations.

Zamboanga Peninsula Polytechnic State University

Practicum OJT 1

Date period

- Optimized student record management for the Senior High School Office by transitioning physical documents into organized digital formats. This initiative significantly improved data retrieval speed and enhanced the overall operational efficiency of the administrative staff.
- Ensured 100% data accuracy in academic records by performing rigorous evaluations and cross-verifying student grades. Through the precise use of office productivity software, I eliminated errors and maintained the integrity of sensitive academic information.
- Streamlined administrative workflows by executing high-volume data encoding and frequent record updates to meet departmental deadlines. My consistent support ensured that the daily operational needs of the SHS Department were met without delays.

Axztech IT Solutions (via ZPPSU Practicum OJT 2

Date period

- Developed modern web applications using **React, TypeScript, and Firebase** to create high-performance digital solutions. By implementing component-based architecture, I ensured that the code remained reusable and scalable for future system updates.
- Collaborated closely on client-based workflows to translate specific business requirements into functional, user-friendly front-end features. I also integrated real-time database solutions to manage dynamic data flow and provide users with seamless, instant updates.
- Utilized **Node.js** to handle backend logic and server-side operations, gaining valuable experience in full-stack development. Throughout the process, I employed strict version control and followed professional industry standards to maintain high-quality code in a team environment.

Skills

Problem-Solving • Time Management • Adaptability • Patience • Willingness to Learn

Course Related Skills: Assemble and Disassemble Computer Parts • UI/UX Design using Figma • Basic C++ • Python • MS Office (Word, PowerPoint, Excel)

TechStack: FROND END • REACT JS • CSS3 • BOOSTRAP • HTML5 • TypeScript • Back End • PHP • FIREBASE • MYSQL • NODEJS

Tools: Flutter • VITE • GITHUB • GIT

Design: Miro • Figma • Canva

Certifications & Professional Training

National Certificate II (NCII) in Computer System Servicing — TESDA

Networking Basics Certification — Cisco Networking Academy

Basics of React, Node.js, and Firebase — Axztech IT Solutions
