PROFESSIONAL SUMMARY

Focused Information Technology professional specializing in Front-End Development and Computer Systems Maintenance. I combine a "design-first" philosophy using Figma with technical proficiency in React, JavaScript, and PHP to build responsive, user-centered applications. With a proven background in hardware troubleshooting and network optimization, I am dedicated to delivering clean code and efficient IT solutions that streamline workflows and enhance system performance.

PROFESSIONAL EXPERIENCE

Southern City Colleges

Oct 2023 – Nov 2023

Maintaining and cleaning computers, assisting with basic networking

- Managed comprehensive technical maintenance for a laboratory consisting of over 30 computer units to ensure a stable learning environment. I performed detailed hardware diagnostics and replaced defective components to proactively prevent system overheating and hardware-related failures.
- Executed clean operating system installations and configured all necessary drivers to guarantee that every workstation was fully optimized. These efforts ensured that administrative personnel and students had immediate access to fully functional and secure computing resources.
- Resolved complex networking issues and provided on-site technical support to maintain consistent connectivity across the campus facility. By monitoring hardware reliability, I was able to troubleshoot and fix connectivity bottlenecks before they impacted daily school operations.

OJT SENIOR HIGH SCHOOL ZPPSU

May 2024 – Jun 2024

Administrative Assistant

- Optimized student record management for the Senior High School Office by transitioning physical documents into organized digital formats. This initiative significantly improved data retrieval speed and enhanced the overall operational efficiency of the administrative staff.
- Ensured 100% data accuracy in academic records by performing rigorous evaluations and cross-verifying student grades. Through the precise use of office productivity software, I eliminated errors and maintained the integrity of sensitive academic information.
- Streamlined administrative workflows by executing high-volume data encoding and frequent record updates to meet departmental deadlines. My consistent support ensured that the daily operational needs of the SHS Department were met without delays.

Axztech IT Solutions

May 2025 – Jul 2026

Front-End Developer

- Developed modern web applications using React, TypeScript, and Firebase to create high-performance digital solutions. By implementing component-based architecture, I ensured that the code remained reusable and scalable for future system updates.
- Collaborated closely on client-based workflows to translate specific business requirements into functional, user-friendly front-end features. I also integrated realtime database solutions to manage dynamic data flow and provide users with seamless, instant updates.
- Utilized Node.js to handle backend logic and server-side operations, gaining valuable experience in full-stack development. Throughout the process, I employed strict version control and followed professional industry standards to maintain high-quality code in a team environment.

EDUCATION

Zamboanga Peninsula Polytechnic State University

Aug 2023 –

Bachelor of Science in Information Technology

SKILLS

-
- **Languages:** TypeScript, JavaScript, C++, Python, PHP, Java
 - **Frontend:** CSS, HTML, React, Tailwind CSS, Bootstrap
 - **Backend:** Node.js
 - **Databases:** MySQL, Fire Base
 - **Tools:** Vercel, GitHub, Git, Figma, Miro, Xamp

PROJECTS

School Asset & Maintenance Management System With QR-CODE

- SwiftMaintenance is a digital maintenance system for educational institutions that uses QR-code technology to connect classroom issue reporting with facility management for faster and more efficient maintenance processes.
